

WHO WE ARE

The Victim-to-Victim Alliance began unofficially years ago when families of gun violence began working together to try to keep each other and victims and survivors of other mass shootings on their feet financially and with resources. Then, in 2022, VTVCare, the Christina Grimmie Foundation, and VictimsFirst came together to create a continuum of care for gun violence victims.

WHAT WE DO

Each year, millions of dollars are spent on gun violence prevention efforts, while relatively little resources are available to the actual victims of gun violence. Furthermore, victims of gun violence do not always know where to turn for help, as it is incredibly difficult to navigate the resources that are available. This is why, in addition to coming together to create a continuum of care for gun violence victims, the VTV Alliance is creating a trusted, centralized resource for gun violence victims nationwide. Through our alliance, verified and like-minded nonprofits are coming together to efficiently provide services and direct financial assistance to gun violence victims.

WHY YOU SHOULD JOIN

By joining the VTV Alliance, you can help ensure that your organization's mission is fulfilled by helping more gun violence victims directly. In coming together, we recognize and value each other for the work organizations do to help victims of gun violence. We also are committed to supporting each other through reciprocal and collaborative relationships between our nonprofit organizations.
